Our Top Travel Tips.

DOCUMENTS

Scan your documents and store them electronically – accessing them at an internet cafe will make it a lot easier to get your holiday back on track if you have an emergency.

MONEY

Only keep a day's worth of cash in your wallet/purse at any one time and the rest in a money belt.

ESSENTIALS

Making sure you have the necessary visas and vaccinations is essential. Speak to your Consultant if you need more information on this.

INSURANCE

Never travel without travel insurance. It's not too late to arrange it. Go to rac.com.au/travelinsurance or call your Consultant.

PACKING

When packing, be ruthless and halve your stuff. Then halve it again. Chances are you can buy extra clothes at your destination if you don't have enough.

HEALTH

Drink lots of water on the plane and avoid alcohol and caffeine as these will dehydrate you. Plus make sure you do the simple exercises in your seat every hour to arrive fresh for your holiday.

DEPARTURES

Airport security can take longer than you think, especially if you are travelling through the USA. Check how long you should arrive at the airport before your flight.

TO DO BEFORE YOUR TRIP

- Stop routine deliveries
- Take out garbage, remove perishables from fridge
- Leave keys, copies of your passport and itinerary with family/friends
- Lock windows, garage, and doors
- Pay any bills
- Check government regulations in advance and leave prohibited items behind. More info at smartraveller.gov.au
- Register your trip with DFAT in case of emergency at the same website.
- For home security products and services, please contact RAC Security on 1300 360 504
- If you are away for 60 days or more, let your home and contents insurer know.
- If you are driving overseas, consider an International Drivers Permit. Arrange this through your local RAC Travel Centre.

GET THE PAPERWORK IN ORDER

- Guide books and maps*
- Passport* (must have 6 months validity upon return)
- Visas* (check requirements with Consultant)

- Deodorant
- Lotions/Creams
- Lip Balm
- Shaver and Shaving Cream
- Towel/Washcloth
- Earplugs
- Emergency toilet paper/tissues

INTERNATIONAL CARRY-ON LUGGAGE

Additional Aviation Security Measures

To increase your safety, there are rules for taking liquids, aerosols and gels on flights into and out of Australia.

Each container of liquids, aerosols or gels in your carry-on baggage must be 100 mL/grams[‡] or less. All the containers must be sealed in a transparent, one-litre plastic bag. You are only allowed one plastic bag. Any transparent resealable bag of one litre capacity or less is allowed. Bags sealed with items such as sticky tape, rubber bands or ribbons will not be accepted. For more information on clear resealable bags please speak to your Consultant.

You may still carry on board prescription medicines. Baby products and non-prescription medicines that you need for the flight are also allowed. Proof of need may be required.

When you get to the screening point, you will have to surrender any liquids, aerosols or gels greater than 100ml/g[‡] that you still have with you, including duty free.

Please Note: These restrictions only apply to international flights, and do not apply to checked-in baggage.

[‡] Your local RAC Travel Centre has small travel goods fitting this requirement available for purchase.

BEFORE CHECK-IN

Are your liquids, aerosols and gels 100ml or less?

- Liquids, aerosols and gels include items such as drinks, creams, perfumes, sprays, gels, toothpaste, lipstick, lip balm and similar substances.

NO

YES

CHECK-IN

If the items are greater than 100ml, place them in your check-in baggage

There are no new restrictions on what you can pack into your check-in baggage.

CARRY-ON

About 20 x 20cm

If you want to take items through the screening point make sure:

- Each item is 100ml or less
- All items fit in a transparent, one-litre bag
- The bag is sealed
- Only one bag per person is allowed.

SECURITY

- Proceed to the screening point
- Present this bag with your other carry-on baggage
- You may be also subject to a random frisk search. This is in addition to the explosive trace detection process already in place.
